TECHNICAL SKILLS

- **Languages:** C, C++, Python, JavaScript.
- **Core Concepts:** Data Structures and Algorithms (DSA), Operating Systems, Database Management System (DBMS), Computer Networks, Object-Oriented Programming (OOP), Operating System (OS)
- **Systems Knowledge:** Basic understanding of Memory Management, Process Scheduling.
- **Backend:** Node.js, Express.js (REST APIs)
- **Frontend:** HTML, CSS, JavaScript, React.js
- **Databases:** MySQL (SQL), MongoDB
- **Tools:** Git, GitHub, VS Code, Debugging, AI Agent Development

EXPERIENCE

★ Trainee Software Engineer – Webkul Software Pvt. Ltd., Noida Feb 2026 – Apr 2026

- Worked on MERN stack to develop and optimize scalable web application modules and REST APIs.
- Debugged and resolved production issues, improving system reliability and performance.
- Followed clean coding practices and contributed to code reviews.

★ Teaching Assistant – Raj Kumar Goel Institute of Technology Apr 2024 – Jun 2025

- Mentored 300+ students in Data Structures, Algorithms, and Operating Systems.
- Helped students understand concepts like memory management, processes, and debugging.

EDUCATION

Raj Kumar Goel Institute of Technology (AKTU), Ghaziabad

B.Tech in Computer Science and Engineering

June 2022 – June 2026 (Expected)

CGPA: 8/10

PROJECTS

★ Complaint Management System

Apr 2025 – Jun 2025

MERN Stack (React, Node.js, Express.js), MongoDB

- Built a MERN-based complaint system with role-based access (Admin, Employee, Student).
- Implemented email notifications for account creation, complaint updates, and status changes.
- Designed a dashboard with filtering and lifecycle tracking (Created, Pending, In Progress, Resolved).
- Developed escalation workflow with OTP-based verification for secure complaint resolution.

★ ProgTracker – Coding Analytics Platform

Mar 2024 – May 2024

MERN Stack (React, Node.js, Express.js), MongoDB

- Built a platform to track and analyze students' coding performance and progress.
- Developed REST APIs and backend services for real-time analytics.
- Optimized MongoDB queries and indexing, reducing dashboard load time by 50%.
- Designed scalable data processing to support multiple users.

★ Autonomous Conversational Agent

Jun 2023 – Nov 2023

JavaScript, NLP, Gemini API

- Developed AI-powered chatbot with intent detection and sentiment analysis.
- Implemented NLP pipeline including preprocessing, classification, and response generation.
- Integrated AI APIs for real-time conversational responses.
- Debugged and improved response accuracy and system performance.

ACHIEVEMENTS

- Solved 1500+ DSA problems across platforms including LeetCode, GeeksforGeeks, HackerRank, and Codeforces.
- Strong understanding of C, C++ programming and problem-solving with focus on efficiency.
- Strong foundation in problem-solving, algorithms, and system design.
